KRAYE ANGUS

WWW.KRAYEANGUS.COM

WELCOME to the 17th Annual Kraye Angus bull sale.

The business of producing beef becomes more complicated every year. In this age of modern technology, we are flooded with more data and more facts that we have to wade through, to make sound, knowledgeable decisions about our cattle breeding programs.

One fact that has remained constant is the fertility and reproductive soundness of the Angus breed. Angus females are unequalled in maternal traits and mothering ability. Angus steers grow efficiently and have the characteristics that improve the quality and consistency of beef.

The bulls in this catalog continue to meet the standards of consistency, quality and integrity that have always been a vital part of our cattle program. With the average EPD's being higher than the national average, this group is a solid set of hard working no nonsense bulls. The bulls are calm with naturally good dispositions.

The yearling heifers were selected from our replacement heifers and have been subjected to the same quality standards the yearling bulls have been. These heifers are being offered for sale as purebred, commercial heifers, and will be an excellent opportunity for someone to add some quality genetics to their cow herd.

Sired by the most progressive bulls, this sale offering will deliver some of the best genetics available in the Angus breed, for both performance and calving ease.

All of the bulls will be semen tested.

All of the bulls will be ultra sounded and the information processed thru the CUP program.

As with all cattle ranchers, we try to learn from past mistakes and we try to anticipate the challenges of the future. We are not always successful, but we try to stay focused and raise good quality honest, hard working cattle.

At Kraye Angus our cattle are our livelihood, our hobby, our recreation and our passion. 98% of all of our cows are home raised and have never been off of the ranch. Our cows are working moms, and they are expected to pay their own way.

We are proud to present this solid set of yearling Angus bulls. These bulls are deep bodied, heavily muscled, strong boned and structurally sound and ready to go to work in anyone's cow herd.

The bulls are fed at home and are available for inspection at any time.

We appreciate your interest in our cattle. If you have any questions or if we can be of any assistance please give us a call.

Sincerely,

John and Julie Kraye and family

- 1st Breeding Season Guarantee -

Bulls selling for \$1500, or more, are guaranteed for 60 days from the first turnout against breeding injury.

If a replacement bull is available, he will be provided. If the buyer prefers, credit towards another bull will be given in next year's sale. Credit for the amount of purchase price minus \$1000 will be applied towards the purchase of another bull. Buyer keeps all salvage value. Please notify us, as soon as possible, should injury occur and prior to the injured bull being sold for salvage.

This is not a Mortality Insurance Policy, nor does it cover mismanagement or neglect. We do not cover injuries sustained prior to the breeding season, if your bull is turned out with other bulls.

If mortality insurance is wanted, a livestock insurance representative will be available.

17th Annual

KRAYE ANGUS Production Sale

Saturday
APRIL 5, 2008
1:00 P.M. MST

at the Kraye Sale Facility - east edge of Mullen

\$Value Indexes

\$VALUES are multi-trait selection indexes expressed in dollars per head, to assist commercial beef producers by adding simplicity to genetic selection decisions. A \$Value has meaning only when used in comparison to the \$Value of another animal. For example, just as with EPD's, variation in \$Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

WEANED CALF VALUE (\$W): an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

FEEDLOT VALUE (\$F): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

GRID VALUE (\$G): an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

BEEF VALUE (\$B): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The \$B value combines the contributions of \$F and \$G.

\$VALUES	
\$W	+21.28
\$F	+13.60
\$G	+12.53
\$B	+25.32
